- Can be installed as a hand shower to replace any existing shower head - last up to 4 years.

### SILVER FOAM

**Net formation foam of silver with the purity of 99.9%**

\*99.99% pure silver is processed to a sponge-like foam form which increases contact surface 6000 times. This is a natural antibiotic which maximises the properties and advantages of silver by increasing the release level of colloid silver.

increases the contact surface 6000 times

The only and first world patented method: Patent No. 10-06968853

**Are you stressed out by your skin?**

**Try taking a shower with colloid silver water offered by our Silverex shower heads.**

A natural antibiotic, silver is fused with the advantages of 'foamified' silver. Effectively reduces bacteria that can cause skin problems.

You can maintain clean and soft skin by just taking showers with colloid silver water. It is a must-have product for children and seniors who lack immunity and have sensitive skin.

# Silverex shower head

## Magnetised Silver Water shower head

Supplied by Hyundai, the new Silverex shower head utilises the characteristics of silver and delivers

them to you through this amazing new product. Using the Hyundai Silverex shower head will leave your skin feeling cleaner and healthier than ever before and it's all down to the outstanding qualities of silver.

When water is forced through the silver impregnated foams inside the handle and nozzle of the shower head, silver ions are produced. These silver ions effectively eradicate bacteria that cause many skin and health problems including colon bacillus, Legionella Pneumophilia and many other types of harmful germs.

The silver ions will de-stress your skin and leave you feeling clean and soft.

### 1. Front nozzle

Titanium dioxide reacts with UV light eradicating harmful materials and germs. The negative ions are produced by dispensing the water through 0.3mm openings in the nozzle.

### 2. Silver foam 1, 2, and 3

Surface contact between the water and the foam is increased by the 2800 folds in the foam that is impregnated with colloid silver. It helps eliminate unnecessary build ups in the body and expands narrow blood vessels helping the natural functions of the body.

### 3. Bullet proof Polycarbonate Head and casing

The Silverex shower head is manufactured from very strong polycarbonate. Equalling the strength of bullet-proof glass, it won't break easily.

**Front nozzle**
