COWAY BA13B

LUXURY HYGIENE, COMFORT & PEACE OF MIND

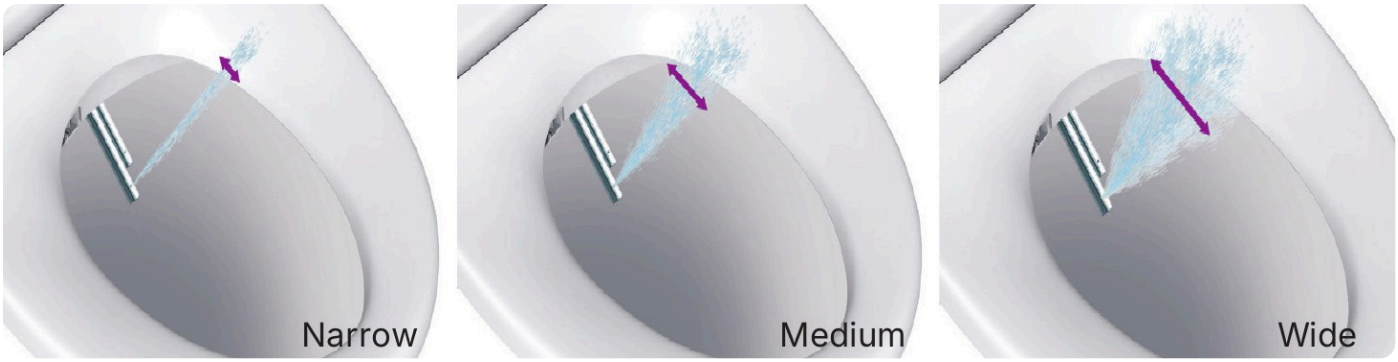

Coway is the number one bidet manufacturer in South Korea, with a long history in toilet hygiene and water purification and many awards for its product design and environmentally friendly manufacturing.

The Coway BA13B is a sleek, versatile bidet suited to the entire family. Its soft lines and subtle curves enrich your bathroom while an energy-efficient instant heating system delivers warm, cleansing water every time.

THREE FEATURES EXCLUSIVE TO THE BA13B

The BA13B includes everything in the BA13A, plus three additional features that add even more luxury: a wide spray function, an automatic deodoriser and silver ionisation.

NARROW, MEDIUM & WIDE SPRAY

The Wide button changes the width of the spray pattern from narrow to medium or wide, similar to a garden hose, so you can cover the area you want. Water pressure can also be set to 3 levels. *(The BA13A provides medium spray only.)*

BA13B ONLY

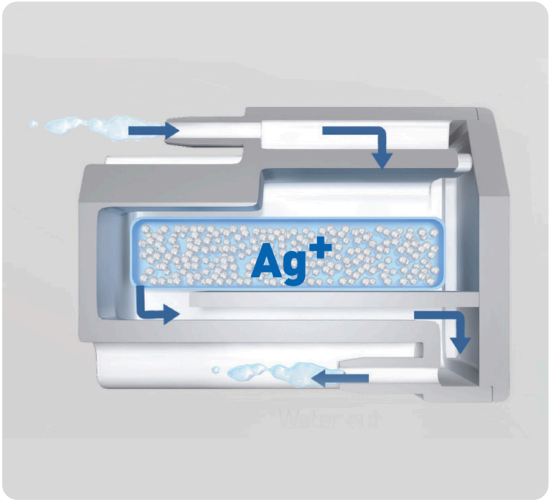

AUTOMATIC DEODORISER

Sitting on the seat activates the seat sensor, which starts the built-in deodoriser. It removes bad odours by drawing air out of the bowl through a charcoal block, neutralising any smells.

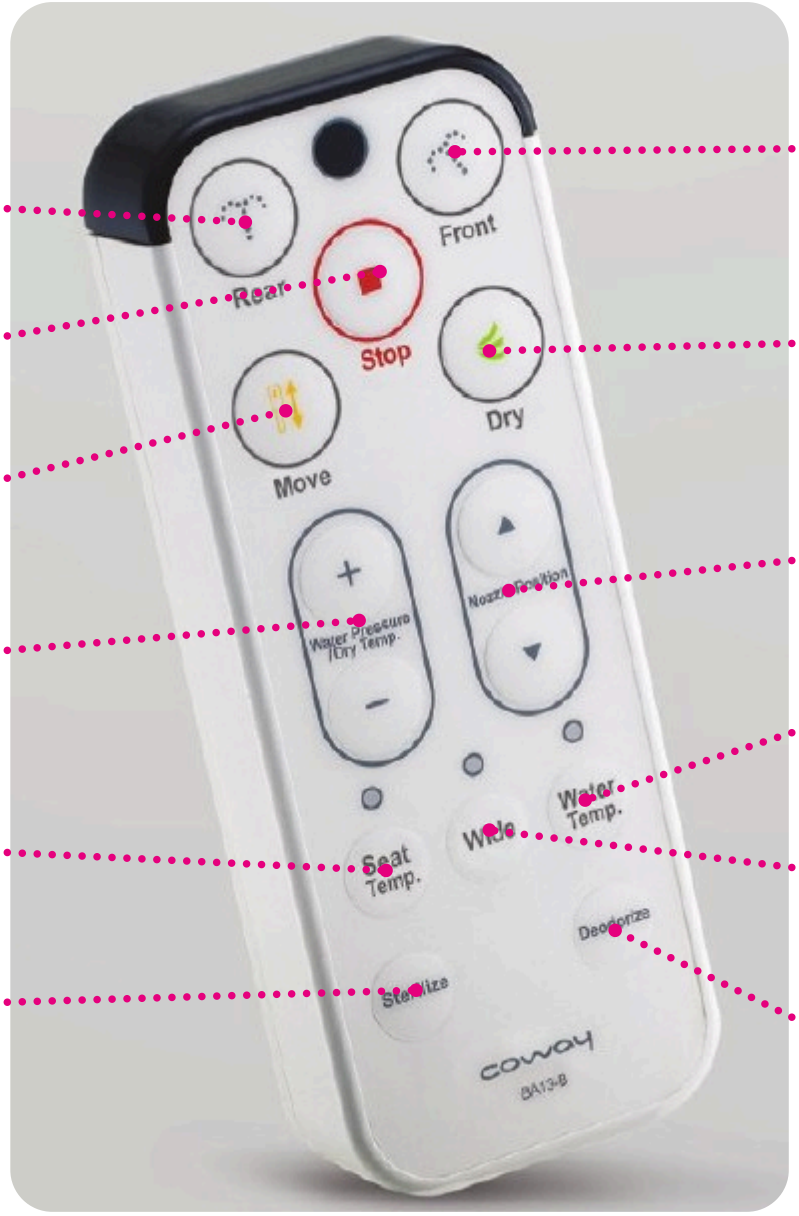

BA13B ONLY

SILVER IONISATION

The BA13B generates its own colloidal silver, which disinfects the bidet every time it is used. When you sit on the seat, the silver ion generator ionises the water passing over the nozzles.

EASY GUIDE TO THE COWAY BA13B REMOTE CONTROL

Rear Cleansing/ Bottom wash (1 min)

STOP button - ceases a function

Move nozzle back and forth during Rear or Front Cleansing

Adjust Water Pressure (washing) or Air Dryer Temp (drying)

Seat temperature adjustment button

Sterilize - silver ionisation (BA13B only)

Front Cleansing/ Feminine wash (1 min)

Air Drying (2 mins)

Adjust Nozzle position (5 levels)

Water temperature adjustment button

Spray width Narrow to Wide (BA13B only)

Deodoriser (BA13B only)

DESIGNED TO FIT COMFORTABLY IN YOUR HAND

The handheld remote reduces the risk of injury that may occur when turning to reach for toilet paper. It snaps magnetically into a wall holder that mounts with adhesive tape, so it is always within easy reach.

Mini side control: Power, Rear Cleansing and Nozzle Cleansing buttons are also on a small pad on the side of the seat.

SUITED TO THE WHOLE FAMILY

The BA13B is designed to be functional, durable, comfortable and energy efficient, a complete personal health and hygiene solution for every member of the household.

The ergonomic lid is designed so you can sit on it when closed, and the bidet supports a safe working load (SWL) of 150 kg.

An optional 3-Way Control accessory is also available, which may assist people with significant mobility difficulties or visual impairments.

HYGIENE & EVERYDAY COMFORT

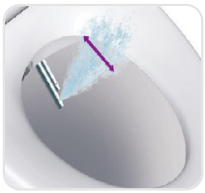

WARM WATER CLEANSING + ADJUSTABLE PRESSURE & TEMPERATURE

WARM AIR DRYING

HEATED SEAT

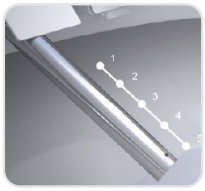

REAR & FEMININE CLEANSING

A dedicated rear wash for the bottom area, plus a separate feminine cleanse for women. Water has 4 temperature settings (no heat + 3 heat) and 3 pressure settings.

TWIN STAINLESS STEEL NOZZLES

The rear/enema and feminine wash nozzles are separated to enhance hygiene and reduce the risk of cross contamination.

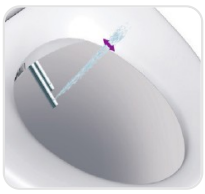

NOZZLE POSITION ADJUST

The nozzle adjusts to 5 different positions and should be set to the correct position for washing.

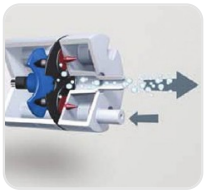

MASSAGE / MOVE

Moves the nozzle forward and backward in a rhythmic action for a more thorough cleanse and a stimulating wash.

ENEMA

A pencil-thin stream of soft aerated water, ideal for constipation. Use while trying to pass a bowel movement for the best results.

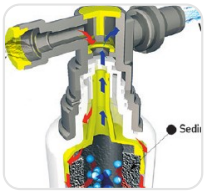

AIR+ WATER STREAM

Injects air into the water stream for a gentler, more comfortable wash.

ANTIBACTERIAL PLASTIC

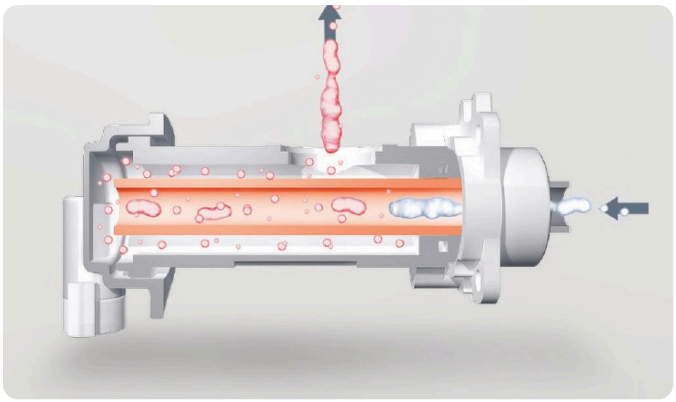

The seat, lid and top case are made with antibacterial plastic to ensure the highest degree of hygiene and cleanliness.

MF FILTER

The filter removes sediment from the water before it enters the bidet, protecting the internal heating system. Replace every 4 months.

SMART, SAFE & EFFICIENT

INSTANTANEOUS HEAT

Water heats inside the nozzle only when the wash button is pressed, providing 4 levels of warm water in a few seconds with no storage tank to keep warm.

SOFT CLOSE SEAT & LID

Hydraulic dampers at the hinges let the seat and lid close softly and quietly, with no slamming.

SEAT SENSOR

A moisture-activated sensor, located between 3 and 5 o'clock on the seat, ensures the bidet functions cannot operate unless the seat is occupied.

POWER SAVING

The bidet senses when it is not occupied and automatically goes into power save mode. This function can be turned on and off.

WATER SAVING

An average wash uses only about a tea cup or two of water.

QUICK RELEASE BASE PLATE

Fits toilets with access to the seat bolts and fully concealed toilets. Press one or two buttons to slide the bidet forward for easy removal.

SELF-CLEANSING NOZZLES

Before and after each use, the nozzles automatically clean themselves to avoid cross contamination. A manual button is also available.

MINI SIDE CONTROL

Power, Rear Cleansing and Nozzle Cleansing are also available on a small pad on the side of the seat.

INSTALLATION & FIT

The BA13B is a retrofit bidet seat and must be installed by a licensed plumber in accordance with the Plumbing Code of Australia and WMTS 051:2016 Bidet Douche Seats, with appropriate backflow protection conforming to the National Construction Code, Volume Three.

Before installing, check:

- Whether your tap is on the left, right or inside the cistern
- A power point within 1.5 m of the toilet
- Whether you have access to the toilet seat bolts
- Toilet dimensions and seat shape
- Whether additional installation accessories are required

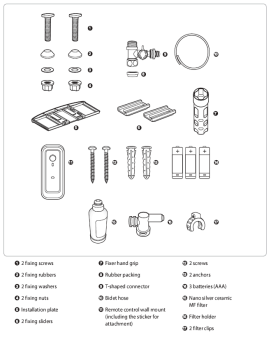

> **Please note:** Looking at the toilet, the 1.5 m power lead comes from the right-hand side and the water pipe from the left-hand side. **This cannot be changed.**

ADDITIONAL PRODUCTS THAT MAY BE REQUIRED

IF YOUR TOILET / TAP IS...	YOU WILL NEED
Tap on the right-hand side	1 m of ¼" white pipe + 1 x Elbow Kit
Tap in the cistern	½" Internal Fitting Kit + 1 x Elbow Kit
Fully concealed / top fixing toilet	Top Fixing Bolts (purchased separately)
Top fixing with arms/rails	Top Fixing Bolts
Top fixing with a 50 mm spacer (with or without arms/rails)	Extra Long Top Fixing Bolts
Top fixing with an 80 mm spacer	Extra Long Top Fixing Bolts + Stabilisers
Top fixing with an 80 mm spacer and arms/rails	Extra Long Top Fixing Bolts + Stabilisers + Extension Brackets
Bottom fixing with arms/rails and an 80 mm spacer	Extension Brackets
