INTELICLEAN PLUS AIR

ULTRA-SLIM SMART BIDET WITH BUILT-IN AIR GAP BACKFLOW PROTECTION

InteliClean Plus Air is proudly Australia's own brand, built with the Australian consumer in mind. It is Australian WaterMarked and certified to ensure high standards of safety and quality.

It has all the iconic bidet features, plus a one-button wash, fast heating, advanced self-cleaning nozzles, a self-diagnosis function and a 180 kg weight rating, all in a seat just 99 mm high.

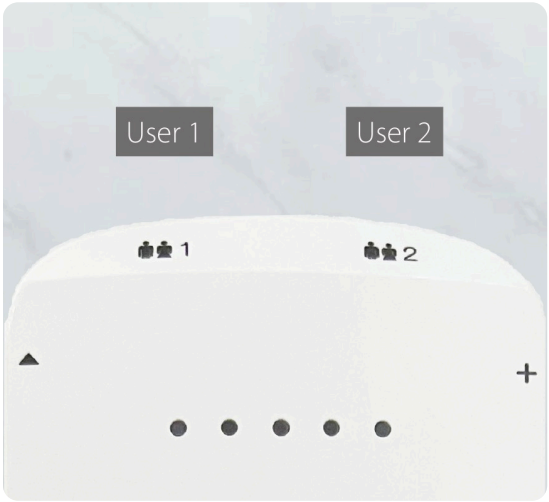

WHAT MAKES THE INTELICLEAN PLUS AIR DIFFERENT

Smarter design, greater independence and uncompromising comfort. The Plus Air adds built-in air gap backflow protection, a near-flat seat and a redesigned remote with larger, raised buttons.

ULTRA-SLIM 99 MM, NEAR-FLAT SEAT

The reduced height and near-flat seat give much more usable seating space than the previous model, a real benefit for bariatric users. It looks like a premium toilet seat rather than an assistive device.

TWO USERS

USER PRESETS

Two users can each save their favourite water temperature, seat temperature, water pressure, nozzle position and dryer temperature, then recall them with one button.

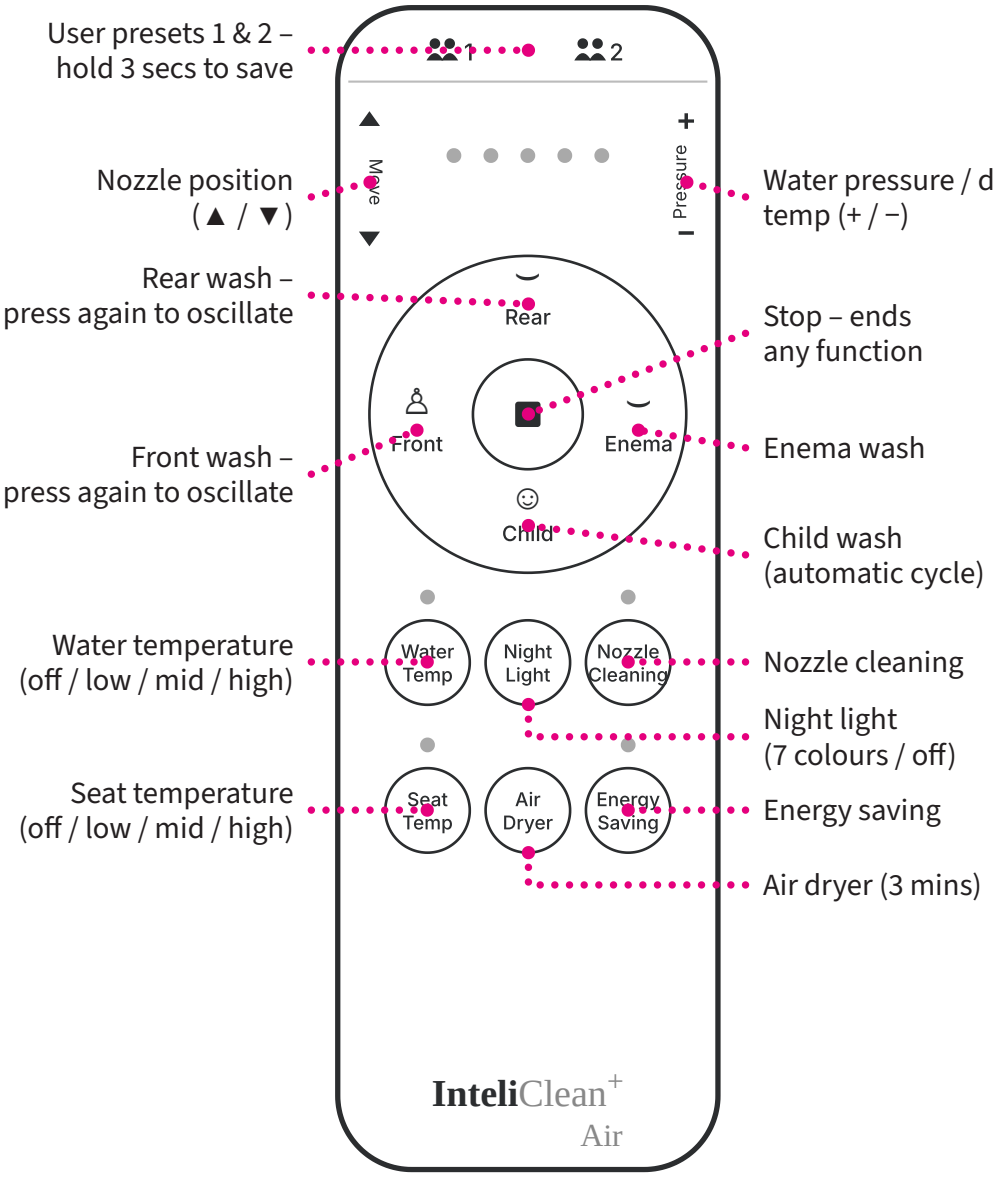

SWIPE & TAP

SIDE CONTROL PANEL

A touch panel on the side of the seat lets you start a wash, oscillate or stop with a swipe or tap of a finger. Handy when the remote is out of reach.

EASY GUIDE TO THE INTELICLEAN PLUS AIR REMOTE CONTROL

LARGER, RAISED BUTTONS FOR EASIER USE

The redesigned remote has larger, raised tactile buttons, making it easier for users with reduced dexterity or vision. Indicator lights show your settings.

Night Light button: press to turn the bowl light on and step through 7 colours.

BUILT FOR INDEPENDENCE

The Plus Air works with The Bidet Shop's range of toilet support arms, spacers and electric lifting systems, for solutions that suit a wide range of mobility needs. A stronger seat and lid add durability.

Child wash runs an automatic wash and dry cycle for children and seniors, and the colour night light helps with night-time trips.

180 kg

Safe working load on every seat shape

99 mm

Ultra-slim profile, one of the slimmest available

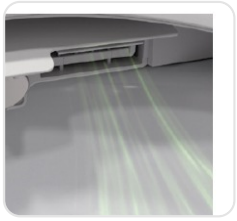

2 shapes

Round and U-shaped, to suit standard and D-shaped pans

HYGIENE & EVERYDAY COMFORT

WARM WATER CLEANSING + 5 PRESSURE LEVELS

WARM AIR DRYING

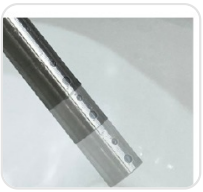

HEATED SEAT

THREE JETS

Separate jets for rear wash, ladies (front) wash and enema give you your preferred wash, with oscillating massage.

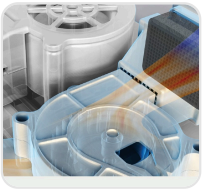

MASSAGE & BUBBLE WASH

Press Rear or Front again and the nozzle moves back and forth for a massage effect. Aerated bubble wash adds comfort.

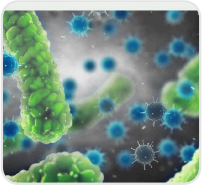

SELF-CLEANING STAINLESS NOZZLES

The stainless steel nozzles are washed before and after every use, with a manual nozzle cleaning mode as well.

DEODORISER

The deodorising filter starts automatically when you sit down, removing odour from the bowl during use and for a minute after.

GERM PROTECTION FILTER

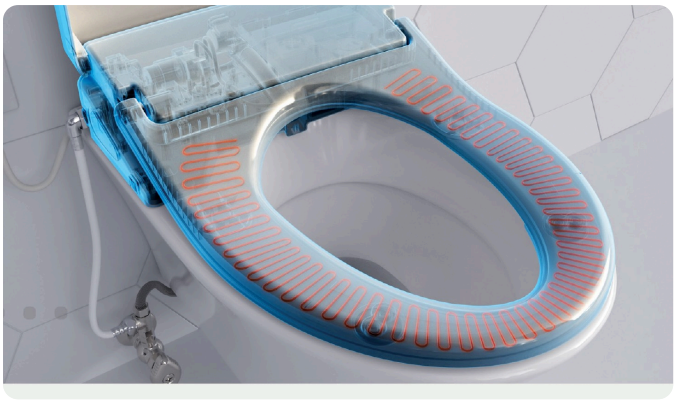

A sediment filter removes particles before the water enters the bidet, then ceramic balls with silver ions attack bacteria, germs and viruses.

COLOUR NIGHT LIGHT

Its own button on the remote steps through 7 colours, then off. It dims in energy saving mode and brightens when someone sits down.

SMART, SAFE & EFFICIENT

HEATED SEAT & CONTINUOUS WARM WATER

Seat and water each have off plus 3 heat settings. Instant heating delivers continuous warm water for the whole wash.

ENERGY SAVING

With consistent use, the bidet learns when it's used most to optimise energy savings. Two saving modes plus a sleep mode.

SEAT SENSOR

Wash and dry functions only work when the seat is occupied, and stop when you stand up.

BUILT-IN BACKFLOW PROTECTION

An integral air gap supports compliant installation and helps minimise plumbing complications.

SELF-DIAGNOSIS

If something goes wrong, the indicator lights show an error code to help our team fix it quickly.

LOW-BURN PROTECTION

The seat uses a low voltage and lowers its temperature during long sits, for safer everyday use.

QUICK RELEASE

Press the release button and the bidet slides forward off the bracket for cleaning underneath.

REINFORCED SEAT & LID

Stronger seat and lid construction gives better durability and load-bearing for everyday use.

INSTALLATION & FIT

The InteliClean Plus Air is a retrofit bidet seat and must be installed by a licensed plumber in accordance with the Plumbing Code of Australia (PCA). It is WaterMarked to WMTS-051:2021.

It is supplied with backflow prevention built in: an integral air gap (high hazard) in compliance with AS 2845.2, as per AS/NZS 3500.1.

Before installing, check:

- Whether your tap is on the left, right or inside the cistern
- A power point within 1.8 m on the left of the toilet
- Whether you have access to the toilet seat bolts
- Your toilet measurements and seat shape (see the last page)

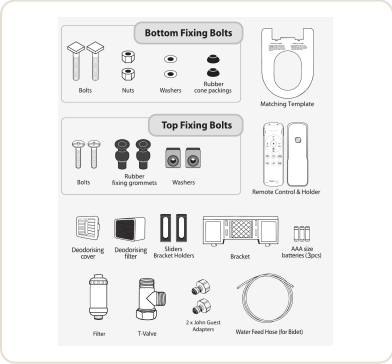

Please note: Looking at the toilet, the 1.8 m power lead and the water connection both come from the **left-hand side**. **This cannot be changed.** Top and bottom fixing bolt sets are both included.

ADDITIONAL PRODUCTS THAT MAY BE REQUIRED

IF YOUR TOILET / TAP IS...	YOU WILL NEED
Tap on the left-hand side	No extra parts. T-valve, filter, John Guest adapters and hose supplied
Tap on the right-hand side	1 m of ¼" white pipe + 2 x John Guest adaptors
